N8N API Authentication Workflow

Execution Evidence | Basic Auth, Bearer Token and GitHub OAuth 2.0

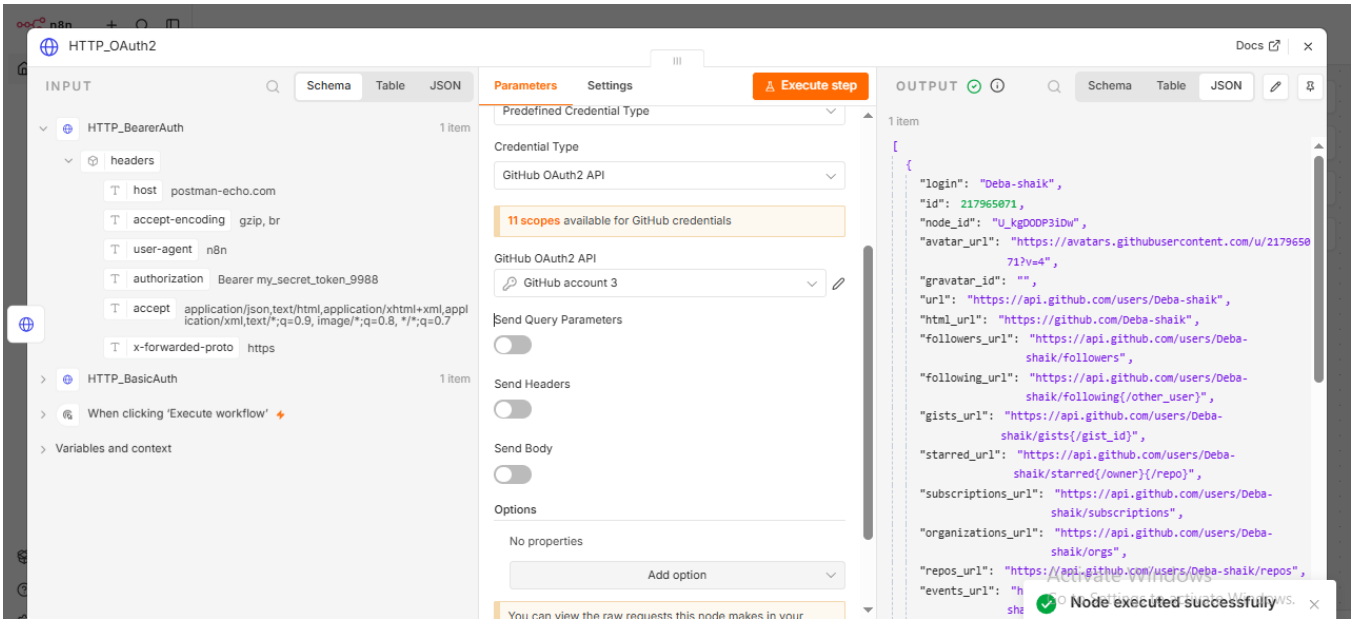

01 Complete workflow - successful execution

All four nodes show green checkmarks. Each connection reports one processed item, confirming successful end-to-end execution.

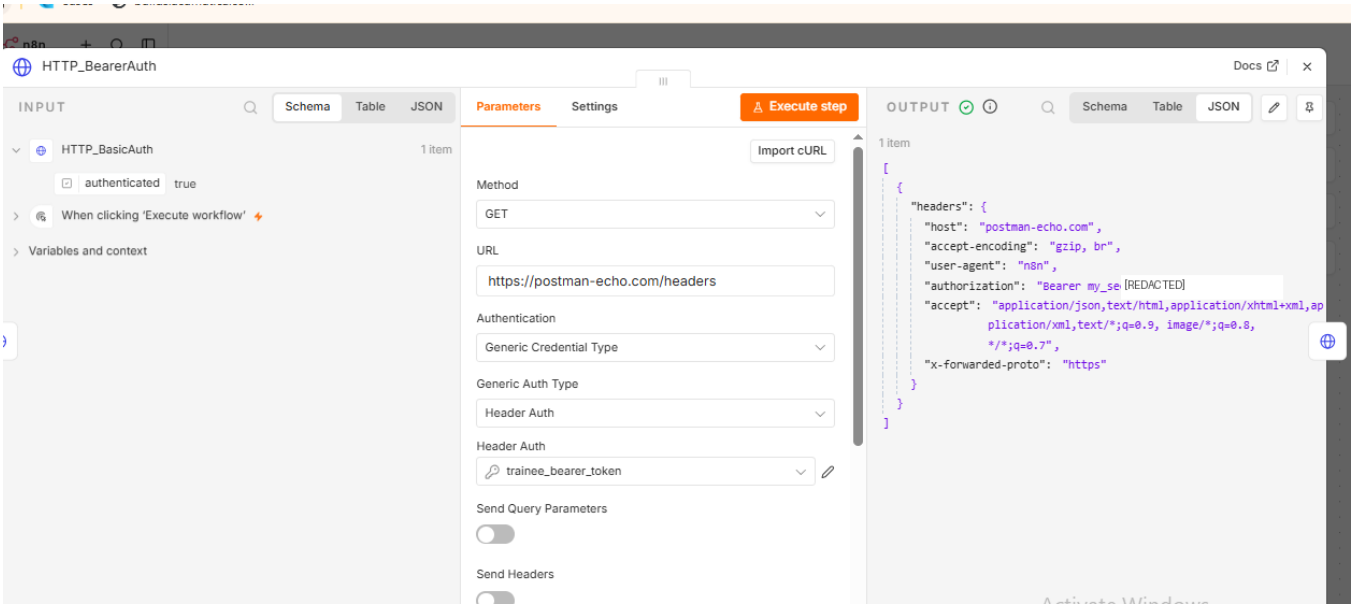

02 Basic authentication - verified upstream output

The HTTP_OAuth2 screenshot includes the preceding HTTP_BasicAuth output with authenticated set to true, confirming the Basic Auth request succeeded.

03 Bearer token authentication - successful response

The Postman Echo headers response includes the Authorization header, confirming that n8n supplied the configured Bearer credential.

04 OAuth 2.0 authentication - GitHub user profile

The GitHub /user endpoint returned account profile JSON, demonstrating successful OAuth authorization and authenticated API access.
